

Amendment to Specification

Please delete paragraphs 94 and 100 from the specification.

Please replace Paragraph [0095] with the following amended paragraph:

Finally, as is apparent most clearly from fig.5, each piston has a running roller 108 (piston 32), 110 (piston 34), 112 (piston 36) and 114 (piston 38). The running rollers 108-114 are part of a control mechanism for deriving the oscillating pivoting movement of the individual pistons 32-38 from their rotating movement about the axis 40 of rotation. ~~For a more precise description, reference is also made in this respect to the document WO 03/067033 A1 whose disclosure is herein expressly incorporated by reference.~~
